

**Date Reported:** Wednesday, June 01, 2016

**Cell Line Gender:** Female

**Cell Line:** 0110 col-1

**Reason for Testing:** quality control for iPSC

**Passage#:** 11

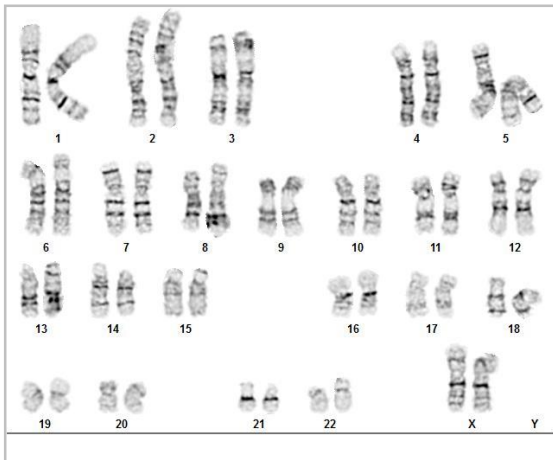

**Date of Sample:** 5/25/2016

**Investigator:** Priyanka Dhanan, Mount Sinai

**Specimen:** iPSC

**Results:** 46,XX

**Nonclonal Findings:** 47,XX,+4,+8,-14 46,XX,inv(9)(q12q22)

**Cell:** 49

**Slide:** 1

**Slide Type:** Karyotype

**Total Counted:** 40

**Total Analyzed:** 8

**Total Karyogrammed:** 4

**Band Resolution:** 475 - 550

**Interpretation:**

**This is a normal karyotype. No clonal abnormalities were detected at the stated band level of resolution.**

**There are two nonclonal findings, listed above. Standard analysis requires that chromosomes are counted in twenty cells. Twenty additional cells were examined with no further evidence of these nonclonal aberrations. Nonclonal findings likely result from technical artifact, but may be due to a developing clonal abnormality or to low-level mosaicism.**

**Completed by:** Erica Schutter, CG(ASCP)

**Reviewed and Interpreted by:** Julie Leana Cox, PhD, FACMG

*Limitations: This assay allows for microscopic visualization of numerical and structural chromosome abnormalities. The size of structural abnormality that can be detected is >3-10Mb, dependent upon the G-band resolution obtained from this specimen. For the purposes of this report, band level is defined as the number of G-bands per haploid genome. It is documented here as "band level", i.e., the range of bands determined from the four karyograms in this assay. Detection of heterogeneity of clonal cell populations in this specimen (i.e., mosaicism) is limited by the number of metaphase cells examined, documented here as "# of cells counted".*

*This assay was conducted solely for listed investigator/institution. The results may not be relied upon by any other party without the prior written consent of the Director of the WiCell Cytogenetics Laboratory. The results of this assay are for research use only. If the results of this assay are to be used for any other purpose, contact the Director of the WiCell Cytogenetics Laboratory.*
